THE ADVANTAGES OF TURKISH PRODUCTS

Türkiye has the world's 19th largest economy and 13th largest GDP with a population of 83 million. Thanks to its young and dynamic people, Türkiye has become a key manufacturer in many industries such as automobile and textile. Moreover, with its strong geopolitical relations, the manufacturing power of Türkiye has increased in the quality in the recent years through numerous incentives. One of these incentives is being in compliance with the EU quality standards as a part of Türkiye's on-going process to join the Union. With a well-educated and young population, Türkiye is full of potential and is able to produce top-quality products for lower prices compared to the European Countries.

WHY SHOULD I BUY FROM TÜRKİYE?

Turkish market offers African business people high-quality and varied products from different industries. Due to its geographical location, Türkiye is closer to African continents than the other exporters like China and India; which makes Türkiye a more reasonable choice for the logistic costs. With their products at EU quality and long-term exportation services, Türkiye might be your ideal business partner. Join WCI and reach your potential with Türkiye!
